Hazard Recognition: Fire Safety; Prevention in Recycling*

Registration is required. Select this course when registering for ISEC.

Join ISRI's safety team for this free 4-hour course on Hazard Recognition: Fire Safety and Prevention. The course was developed to assist employees, team leads, supervisors, plant managers, and senior leadership in understanding hazards associated with fires in the recycling and materials recovery facilities (MRF) environments. Attendees will learn ways to potentially control these hazards in an attempt to prevent significant fire losses.

All levels of recycling company employees are encouraged to attend. This course is co-taught by a member of ISRI's safety team, alongside a fire professional familiar with recycling facilities.

12:15 PM	Lunch for those staying for Fire Class	Indianapolis Ballroom
