

## **ReMA One-Bin Collection Policy<sup>1</sup>**

### **Overview**

ReMA supports the collection and sortation of recyclable materials in a manner that optimizes the value and utilization of the material as specification grade commodities to be used as feedstock to manufacture new products.

Since the quality of the recyclables as specification grade commodities is essential, ReMA opposes the commingling of recyclables with solid waste or mixed waste processing in a one-bin system where all solid waste and recyclables are placed together with no separation prior to recycling.
