

# Good driving skills apply to all types of equipment!

Driving equipment in the yard requires the same caution and attention to surroundings as driving down the highway.

- > pay attention
- > do not operate equipment you are not trained and qualified to operate
- > always wear your seatbelt
- > inspect your equipment before use
- > keep eye contact with pedestrians
- > avoid speeding
- > carry the load close to the ground
- > if the view is blocked - slowly drive backwards
- > do not operate equipment with poor brakes or missing safety devices
- > report all accidents to your supervisor

**Safe driving is everyone's responsibility!**
